About the designer

Tõnis Vellama is the creative mind behind SEOS Lighting's innovative designs. Graduating from the Estonian Art Academy, Tõnis's diploma work was an outdoor lamp collection installed in front of the Estonian National Library. He has crafted numerous original fixtures for prestigious public spaces, including embassies, concert halls, and hotels. His work has been exhibited around the world, and he continues to push the boundaries of lighting design.

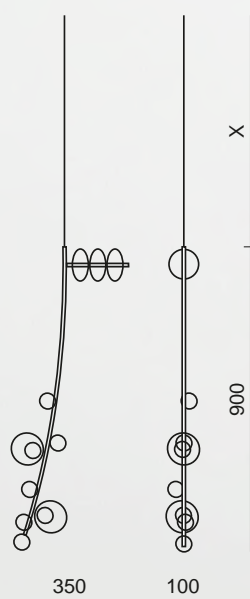

Our collection

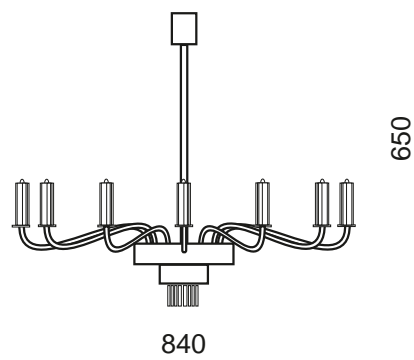

Featuring two sizes of glass sphere arranged on a smooth arc, Lumimari offers flexibility in creating appropriate groups of lights suspended at different heights, adding a touch of elegance to any setting.

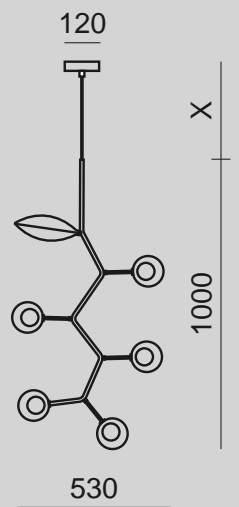

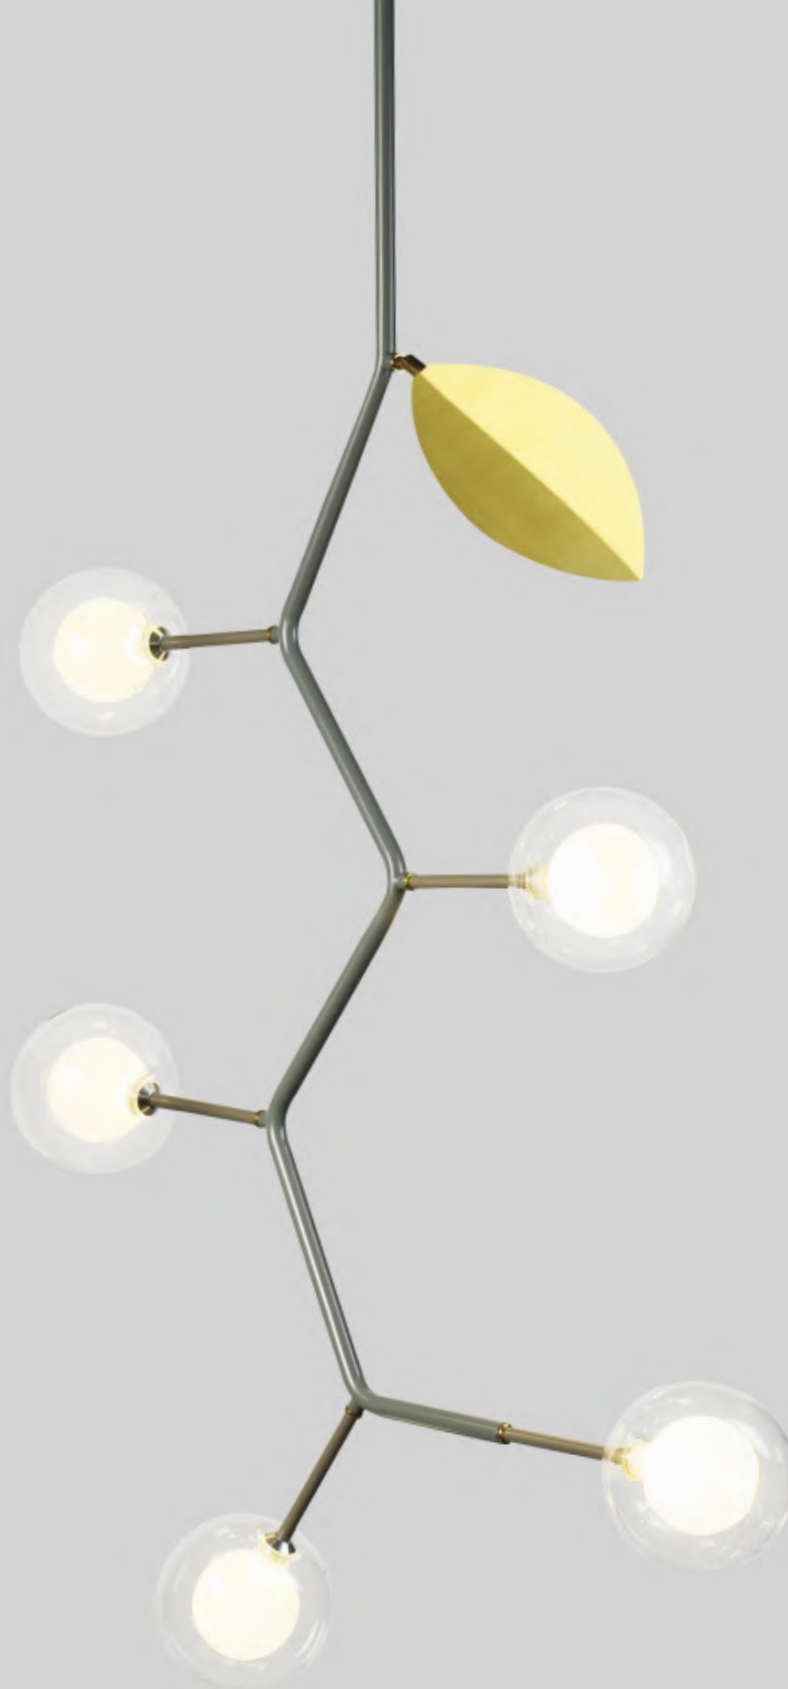

Chandelier inspired by Art Deco in a modernist and minimalist, yet luxurious style. Glass-profiled 'candles' refract the light in the same way as crystals. A spotlight in the middle accentuates items on the table.

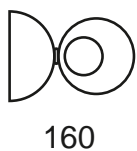

Bloss

/ 10

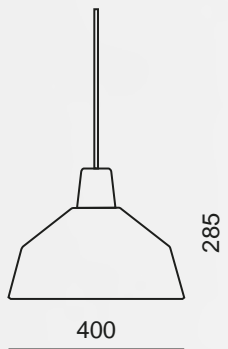

Inspired by a branch of a tree, Bloss features glowing balls resembling blossoms or berries, with brass or copper leaves adding a touch of elegance. This element can be used individually or clustered to suit various room settings.

Simple yet elegant, Mari is a versatile wall lamp that seamlessly combines with Inflore, Lumimari, and Bona Fide. Its chic design adds sophistication to any space, offering endless combinations for interior decor.

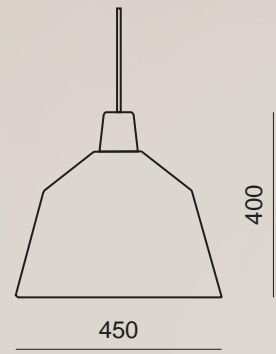

Flot S

Combining curved shapes with warm 50s aesthetics, Flot pendant features an industrial felt shade produced from recycled plastic bottles, offering excellent acoustic qualities. Perfect for private residences, restaurants, and offices, it adds a touch of warmth and style to any environment.

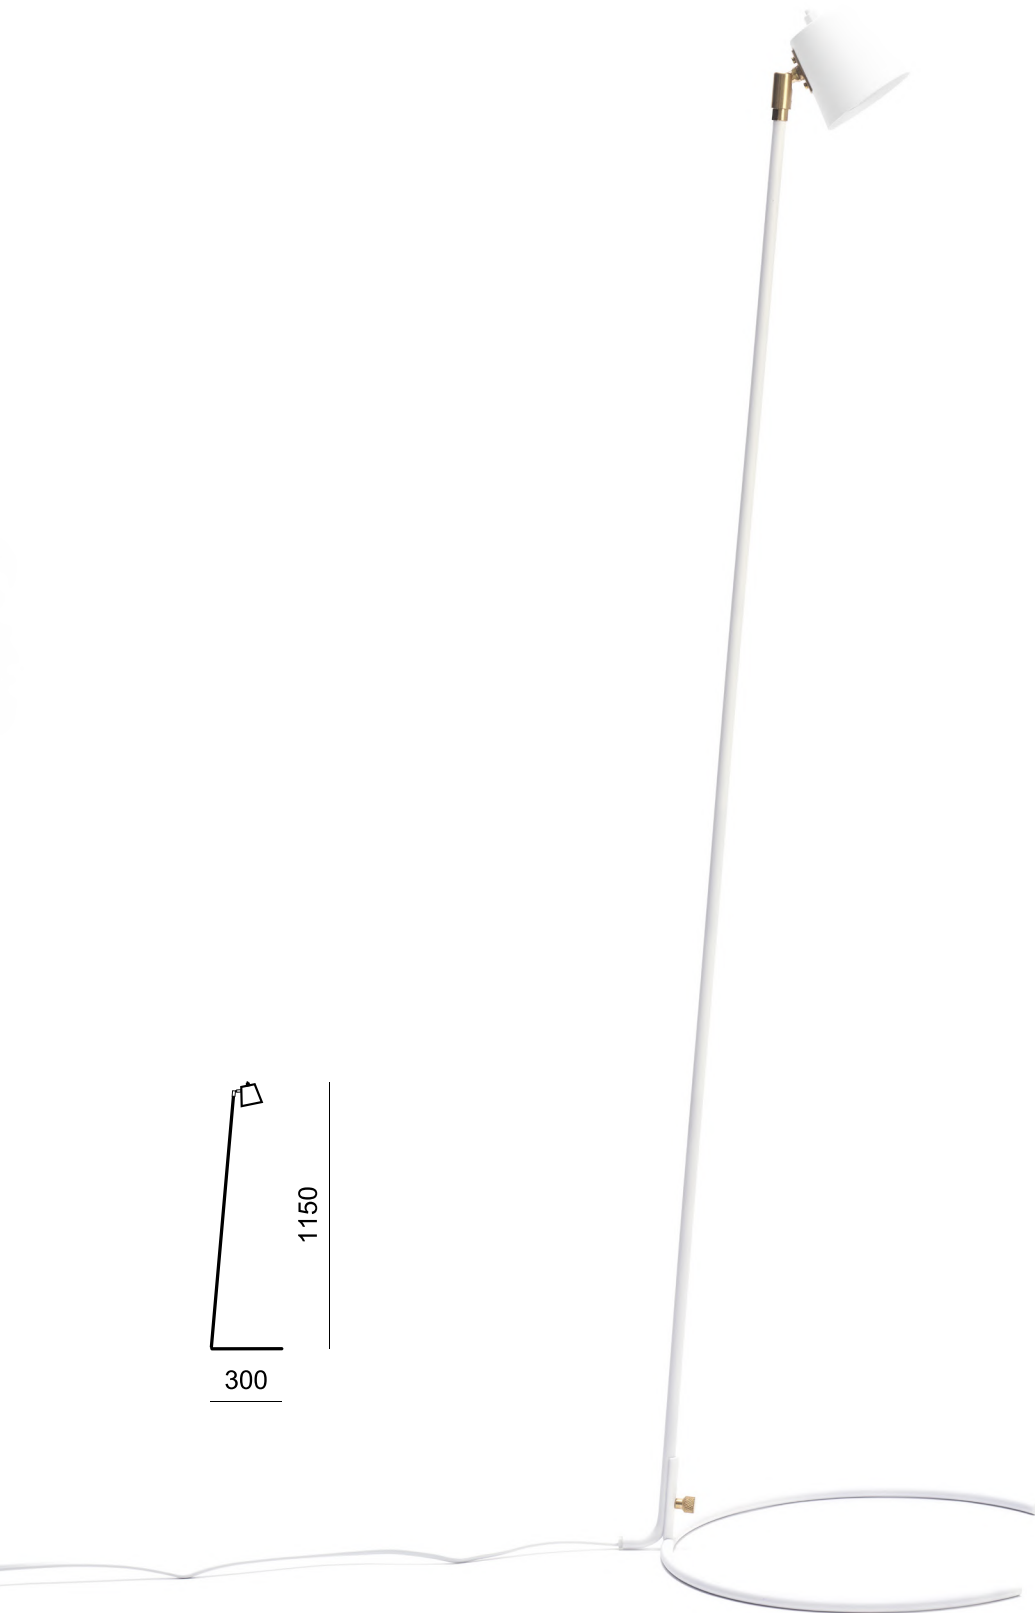

Design by Mihkel Mölder.

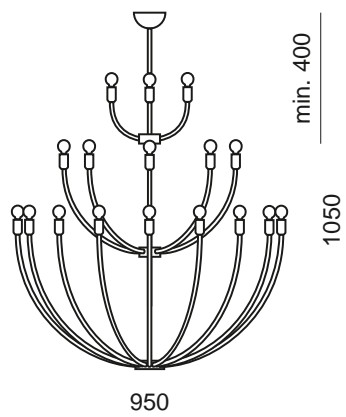

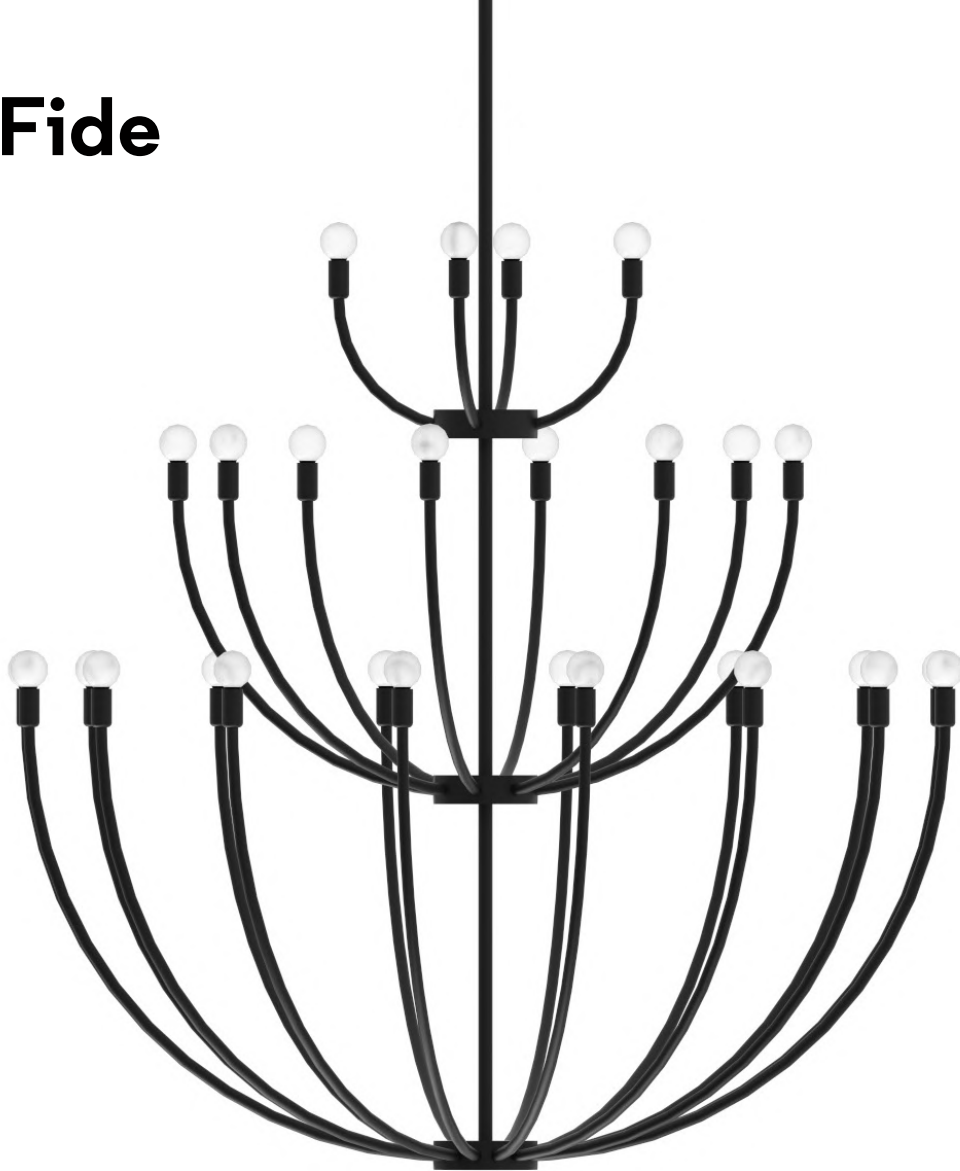

Flot L

Practical and slender, Gunnar floor lamp offers directional light with its switch conveniently located on top of the dome, ensuring ease of use and functionality. Perfect for any space requiring focused illumination.

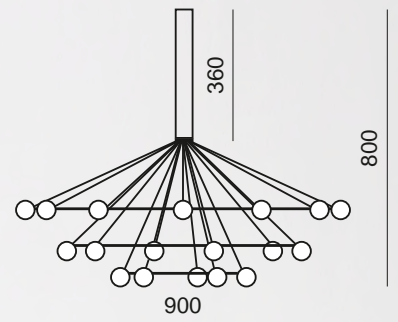

Pure form and plain construction define Bona Fide, creating a natural cluster of stems pointing upwards. Customizable in size and combination, it offers versatility for interior design, with the option to change its appearance.

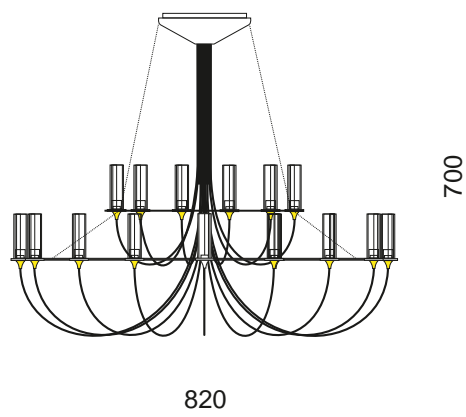

Inflor

Resembling the shape of inflorescence, Inflor showcases sandblasted glass balls resting on a wire frame, forming a simple cluster. Its ultralight construction and various suspension solutions make it a versatile choice for space.

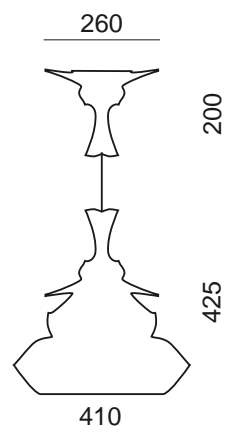

Lucerna

A festive and airy modern chandelier where glass "candles" are supported by a metal ring. The cables hang freely, shaping this graceful light fixture. Customizable in size and hanging solutions to suit any interior.

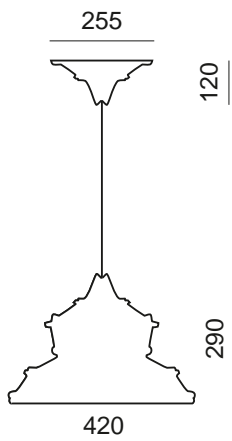

This lamp has been created out of three pairs of women shoes; high heels, flats and platforms. Several trails with women and men shoes, winter shoes and summer shoes were created, but the party shoes mix was the most interesting.

Design by Johanna Tammsalu.

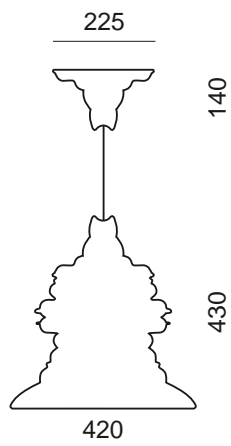

The Key pendant is composed of ten regular keys. Everyone can find these types of keys in their pocket. All of them have small details that add beautiful zigzag detail and texture to the lamp's contour. The inner detail has been smoothed for better light reflection.

Design by Johanna Tammsalu.

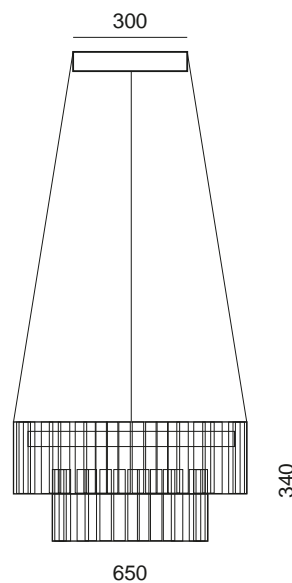

The Sunglasses lamp is created by stacking twelve pairs of vintage sunglasses in the shape of a cone. Some glasses are facing inwards and others outwards. This gives the lamp an interesting bubbly surface.

Design by Johanna Tammsalu.

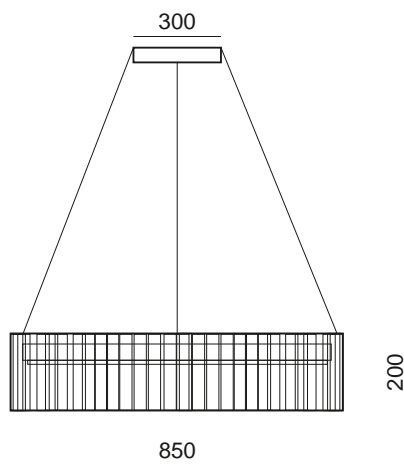

Noble 6.2

/ 30

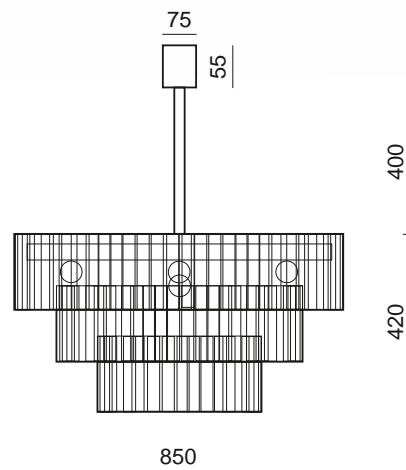

Noble 6.2 is timeless and classical in a modern way. In addition to adjusting the brightness, the light's color temperature can be changed between 2700–6000K (tunable white).

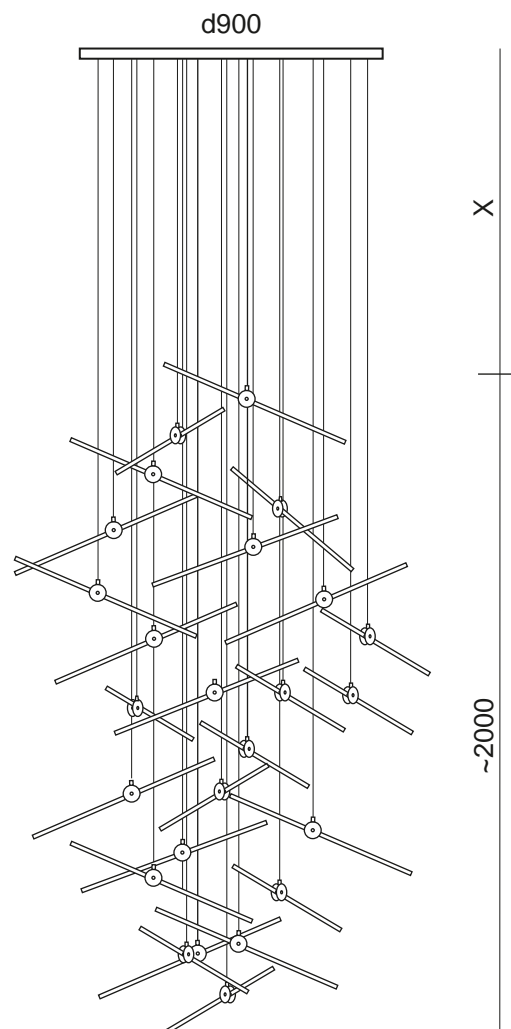

Noble 8.0 chandelier features an LED light inside the frame, positioned behind the closely arranged crystal glass profiles. In addition to adjusting the brightness, the light's color temperature can be changed between 2700–6000K (tunable white). This model also works well with lower ceilings.

The Noble 8.3 chandelier creates a festive atmosphere with its crystal glass profiles while maintaining a classic chandelier shape. The profiles are arranged in a circular pattern across three staggered rings of varying sizes, using light sources with E14 sockets.

The Rhizome chandelier offers a distinctive aesthetic with its slender light elements, irregularly arranged and angled in various directions. Suspended freely from delicate cables, these elements form a unique composition. The design is especially well-suited for larger, multi-level spaces, creating an impressive ambiance whether viewed from below or above.

Production

SEOS brings over two decades of experience to every product design and installation, ensuring the highest quality.

We are committed to delivering the best in design and technical solutions, and our team of professionals works towards this goal every day.

The Office of the Chancellor of Justice

Historical style and most up to date lighting technology. General illumination - up and down is dimmable. Additionally decorative "candles". Besides different light scenarios, there is also an emergency light in a middle.
